Reluctant Presenter

30 Minutes from Now

I made so many fancy slides!

Like this one!

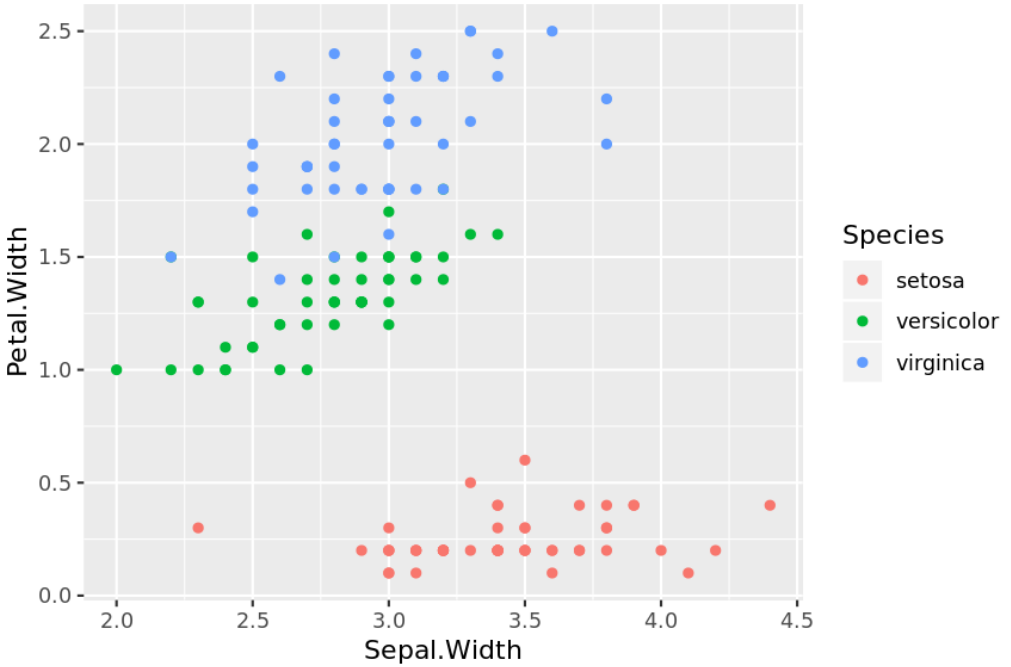
It has a very nice list of my favorite **built-in** data sets

1. iris
2. mtcars
3. airquality
4. starwars
5. diamonds

Photo by Balázs Kétyi on Unsplash

I made a plot with some R code

```
library(ggplot2)
ggplot(iris) +
  aes(Sepal.Width, Petal.Width, color = Species) +
  geom_point()
```



I even have a cat gif

and that's when they told me...

pOwErPoInT oNlY!!1!1!!

```
fs::dir_create("slides")
pagedown::chrome_print("slides.html", output = "slides.pdf")
pages <- pdftools::pdf_info("slides.pdf")$pages
filenames = sprintf("slides/slides_%02d.png", 1:pages)
pdftools::pdf_convert("slides.pdf", filenames = filenames)
slide_images <- fs::dir_ls("slides", regexp = "slides_\\d+[.]png
slide_images <- glue::glue(
  "
---

![]({slide_images}){{width=100%, height=100%}}

")
slide_images <- paste(slide_images, collapse = "\n")
md <- glue::glue(
  "
  ---
  output: powerpoint_presentation
  ---

  {slide_images}
  "
)
cat(md, file = "slides_powerpoint.Rmd")
rmarkdown::render("slides_powerpoint.Rmd")  ## powerpoint!
```
